

## Next-Gen Cloud Intelligence Management Platform

### AICOM AI Cloud Optimization Management

A one-stop platform that integrates cloud management, intelligent analytics, proactive monitoring, and real-time alerts. It empowers businesses with cost optimization, performance enhancement, and better decision-making, effectively solving multiple operational challenges.

#### Empowering Cloud Resource Management

Integrating AI-driven technology and cloud services, AICOM helps standardize cloud management tasks, optimize costs and resources through data empowerment, and simplifies workflows with AI-powered customer service and technical support. This boosts operational efficiency and customer satisfaction, enabling corporate digital transformation.

**Consolidation** One-Stop Integrated Management to accelerate decision

**Optimization** Intelligent analytics for optimization of cost and resource

**Surveillance** Automated monitoring for the abnormal quick response

#### Cost and Billing Optimization Management

Precise control and forecasting to effectively reduce hidden costs.

#### Cloud Resource Usage Management

Streamlined management with real-time monitoring of resource changes.

#### User Security Risk Management

Reduces IT operational burdens and ensures compliance.

《 Industry-leading AWS FTR certification,  
meeting global technical standards 》

#### Multi-Project Cost and Budget Control

Cost management teams can accurately track and control project costs and budgets, ensuring completion within budget and optimal allocation of budget.

#### Multi-Unit Role-Based Security Management

Administrators can assign appropriate access permissions to different units, ensuring data security and compliance.

#### Cloud Resource Utilization Optimization

Administrators can monitor cloud resources in real time, assisting with optimal allocation to improve resource efficiency and ensure stable operations.

#### Anomaly and Risk Control

Administrators can monitor anomalies in cloud resources and costs in real time, quickly responding to potential risks and ensuring the stability of cloud resources and costs.

## AICOM Product Solution

		Combo Plan		Individual Plan
		Select Bill mgmt	Premium Bill and Resource mgmt	Resource Additional Order
<b>Account Management</b>	Two-Step Verification	●	●	●
